

## Why tubular poles are better than shepherds hooks

- Tubular poles do not bend
- They have modular components for add-ons
- Are almost never found in box stores
- Are cheaper to ship
- Allow you to make add-on sales with more accessories
- They have multiple types of ground mounts for all ground conditions
- Can be extended
- Will fit directly into standard bird feeders
- Can be squirrel and raccoon proofed
- Shepherds hooks cost more to ship
- They always bend when the weight is out of balance
- They are commonly sold at box stores
- They have a shallow footprint

## Add-ons for Tubular pole systems

- Ground mounts
- Bird baths
- Perches
- Extra arms
- Squirrel baffles
- Deck Plates
- Finials
- Suet Baskets
- Birdhouse mounts
- Jelly Feeders
- Perch branches
- Pole extensions
